Job Title: eCommerce Web Developer

As the business expands, our team moves to the next level of our workflow automation which will increase our work efficiency and effectiveness and provide better service to our customers. In this project, we are seeking a senior eCommerce web developer to boost in-house ERP development. As a senior eCommerce web developer, we are looking for a great full stack developer with skills to manage any type of framework.

Responsibility Areas:

The candidate will be responsible in below criteria:

- Develop and deliver a fully functional B2B eCommerce website.
- Work with Web Development team to identify web systems needs and solutions
- Configure, design, and develop solutions including key integrations to 3rd party solutions
- Monitor and track system processing and performance indicators to ensure business requirements are being met
- Maintain state of the art understanding of website and mobile platform capabilities

Minimum Qualifications:

- Minimum 5 year+ full stack experience in E-Commerce and Web Applications
- Strong experience in node.js, React, and any E-Commerce platform
- Experience in E-Commerce standards and security requirements preferred
- Experience in integrating web applications with ERP and other applications, middleware experience a plus
- Experience in GCP (Google Cloud Platform) is a plus

Preferred Qualifications:

- Highly efficient in both Korean and English
- Excellent communication and organizational skills.

We offer our employees a competitive salary and comprehensive benefits package including health insurance, and subsidized lunch. We are always looking for individuals with the talent and skills required to contribute to our continued growth and success.

Work Hours: Full-time (Monday – Friday: 8:30AM – 5:30PM)
